

WASTE WATCHER®

The World's Most Customizable Recycling & Waste Station

The Waste Watcher® series is a favorite in the recycling & waste industry! Having launched in 2008, the Waste Watcher® has repeatedly shown that its multi-stream design gives organizations the ability to increase their recycling rates and attain their sustainability goals.

Recycling programs differ greatly based on location; the series adapts well with existing programs and can be customized to tailor to a variety of collection needs. The carefully crafted Waste Watcher® adds practicality and functionality to any recycling program!

Though the world of recycling & waste collection has expanded since the launch of the Waste Watcher®, this product consistently keeps up with the ever-evolving demand. Flexibility was a priority when designing the Waste Watcher®— and we've mastered it.

23 Gallon

The Waste Watcher® brings the ultimate solution for addressing your recycling & waste collection requirements and is offered in three sizes to suit varying capacity needs.

- Trusted capabilities make this bin a customer favorite
- Increase participation while reducing servicing with various capacity options
- Station customization provides high-visibility to help improve program presence
- Reduce contamination with mobile, connected station

32 Gallon

The Waste Watcher® XL has the same customizability and versatility as its smaller companion, the Waste Watcher. What differentiates the two is that the Waste Watcher® XL offers higher capacities; mix and match between the two series to maximize your results!

- High capacity bins work well in high traffic locations
- Impactful signage, labeling and available customization helps cater to the success rate of your program
- Compatible with the Waste Watcher® Series

Most Popular Stations

Our years of experience with the Waste Watcher® have allowed us to analyze the buying trends of purchases of this product. These trends have shown us what customers really want and need for their program to be successful in regards to streams and signage.

Help standardize recycling by increasing the commonalities across collection programs nationally. By using colors, openings, icons and verbiage that is intuitive for the user, the less likely streams will be contaminated. The more standardized the station, the easier recycling and source separation will become for the user which will ultimately increase your diversion rate!

Here are some of the most common configurations that customers regularly purchase for their programs.

Build your WASTE WATCHER® Station

The Waste Watcher® series reduces the stress of adding or removing streams, rearranging stations and making adjustments to your program. Consistency is key; being able to alter your program to keep up with the demand of your evolving needs has never been so easy!

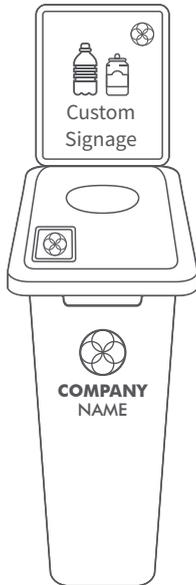

Choose your components:

-  1. Body
 - Waste Watcher (16G, 20G, 23G), Waste Watcher XL (24G, 28G, 32G)
-  2. Lid Opening
 - See pages 3 & 4 for available openings
-  3. Graphics
 - Choose from our stock options or customize your own!
-  4. Optional Accessories
 - Sign Frames, Connectors, Wheel Dollies

Customize your Station

The series can accommodate both single-stream and multi-stream programs; the artistry of the Waste Watcher® is being able to personalize it to your exact needs.

Custom Signage
Do you have a unique stream that we don't offer in our stocked signage? Enlist the help of our in-house graphic designers who can help make your concept a reality.

Custom Labels
Not satisfied with our standard labels? We can design custom labels to suit your recycling & waste requirements.

Add more Graphics
Help increase your brand's corporate social responsibility and exposure by branding your containers.
